

Chore Auction Board

Everyone bids chips to skip a chore. The lowest bid does the chore and collects the chips.

Week of _____

How the auction works

1. Everyone starts with 10 chips. Chips carry over from week to week.
2. Read one chore out loud. Everyone secretly writes a bid, from 0 up to the chips they hold right now.
3. The lowest bid does the chore and collects every chip bid on it, their own included.
4. Tie for lowest: whoever did this chore last time sits out. Still tied? Flip a coin.
5. Chips are points, not money. Spend them only on the rewards list.
